- Generated detailed specs of final designs.
- Completed hand sketches of potential designs using artistic skills and understanding of desired direction.
- Worked on collections for Backcountry, Electra, Handful, Nike, Lulu Lemon

PROJECTS

TAP A KEG

This app has full CRUD functionality, allowing users to interact with a database of "kegs". Built with React and Ruby backend. My version of a "Help Queue".
https://github.com/cordwalsh/beer-garden

BETTER DOCTOR

Better Doctor is an app that uses an API call to find doctors in the area. The user inputs an area of the body that needs attention and their city or location. The top 10 doctors in that field are displayed. Built with Javascript.
https://github.com/cordwalsh/independent-project-6

WINNIE THE POOH

An interactive story book that accesses your microphone and listens to keywords read out loud to auto scroll down the page. Heavily utilizes parallaxing to give the site a whimsy affect. Built with React and Javascript.
